Questions/Answers

Question 1:

Where do we use end devices and why?

Answer:

End devices are used to form the interface between the human network and the underlying communication network. We can use these because people are most familiar with these (End Devices).

Question 2:

Where do we use intermediate devices and why?

Answer:

We can use intermediate devices in connecting end user routing to other networks or used for connecting directly to end user devices and it can provide individual host to the network and can connect multiple individual networks to form an internet-work.

Question 3:
