

Why and where we use Ethernet Cables?

Ans. Ethernet cables are used to connect computers, routers, switches, and modems so that data can travel between them. They are mostly used in local area networks (LANs).

2. Cross Cable and Straight Cable are derived from Ethernet Cable?(True/False)

Ans. True Because Both cross and straight cables are types of Ethernet cables.

3. What is the difference between UTP and STP Cables?

Ans. Unshielded Twisted Pair (UTP): No additional security is present. less expensive and more widely utilized. Shielded twisted pairs, or STPs, have an additional layer to guard against signal interference. It provides better protection and is more costly.

4. Why each pairs inside the cable is twisted together?

Ans. To lessen signal interference and ensure error-free data transfer, the cables are twisted.

5. What is mean by "Cat" in Cat5 Cable? What is the difference between Cat5 and Cat6 Cable?

Ans. "Cat" stands for "Category." Cat5 cables can handle speeds up to 100 Mbps. Cat6 cables support much faster speeds, up to 1 Gbps or more, and perform better over longer distances.

6. What is the purpose of Crimping tool?

Ans. A crimping tool is used to fix an RJ-45 connector onto the end of an Ethernet cable, making it ready to plug into a computer, router, or switch.

7. What is the purpose of Stripping tool?

Ans. A stripping tool is used to peel off the outer layer of a cable to expose the inner wires for connection.

8. What is the purpose of Tester in Cable making?

Ans. A tester is used to verify that the cable is functioning correctly and that all the wires are properly connected.

9. What is the meant by RJ-45 connector?

Ans. RJ-45 is a connector placed at the ends of Ethernet cables to link them to devices like computers, routers, or switches. 10. Where we can use Cross Cable and Straight Cable? Ans. Straight Cable: Connects different types of devices, such as a computer to a switch or a router to a switch. Cross Cable: Connects similar devices, like computer to computer or switch to switch.
